## ELEVATE'S GALLERY OF COSMETIC ENHANCEMENT

### SPACE AND BADLY DAMAGED TEETH REPLACED

All-ceramic bridge allows my patient to chew again with confidence! I removed the bad middle tooth, replaced big old silver filling. She is thrilled to eat now!

### CERAMIC CROWN FOR FRACTURED TOOTH

Repair of obvious severe crack and fillings on this damaged tooth. New crown evens out look and protects tooth from further cracks! She is happy to smile at work again!

### SINGLE EMAX CROWN THRILLS PATIENT!

He gets to keep his tooth! Start to finish in my office. More work to be done on adjacent teeth.

### INVISALIGN AND SMOOTHING OF DAMAGED TEETH

All teeth more even around the arch means better bite (less future damage), cleaning and aesthetics. More even show of lower teeth and matched front teeth.

### EMAX CROWN FIXES PREVIOUS FILLING

I changed this very old and redecaying filling fix of a chip. Stronger and more aesthetic!

### INVISALIGN FIXES SEVERE CROWDING

I fixed this patient's aesthetic and bite concerns. After Invisalign, I smoothed her front teeth which were damaged from the severe malocclusion and lengthened her right side gums to match the left.
